ABOUT ME

During the time span in which I created my first programming projects, I discovered my passion for being a programmer. I much prefer problem-solving to rote memorization. I enjoy seeing patterns and processing challenges logically. I've tinkered with Legos when I was a little kid. You know what they say: the better you get at something, the more fun it becomes.

PROGRAMMING EXPERIENCE

Team Profile Generator
Set up a questionnaire and enabled dynamic page rendering using Node.js, which allowed for the creation of a back-end system that lets managers input information to create a roster of employees.

Tech Blog
Set up a system to retrieve, store, and display information by implementing a SQL database, vanilla Express.js routes, and MVC, which gave way to a website that allows users post to about technology.

Weather Dashboard
Retrieved data from a website called Open Weather by setting up a fetch request to Open Weather's back-end API, which allowed for the making of a rudimentary weather dashboard that can forecast the weather.

Computer Games
Built basic computer games using the high-level, general-purpose, readable, object-oriented language known as Python.

SKILLS

HTML, CSS, JavaScript, jQuery, responsive design, React, Bootstrap, APIs, Node.js, Express.js, mySQL/Sequelize, MongoDB/Mongoose, REST, MERN, GraphQL, Python, C++

EDUCATIONAL BACKGROUND

UC Riverside Extension – Coding Bootcamp	Certificate	11/2021 – 04/2022
Riverside City College		08/2019 – 06/2021
University of California – Riverside	B.S. in Biology	09/2015 – 05/2019

WORK EXPERIENCE

Warehouse Associate, Amazon Fulfillment Center	03/2021 – 07/2021

- As a warehouse associate, I layered boxes on pallets, moved pallets across the warehouse, and sorted and scanned packages.
